LP Gas Business -Guidelines for Good Business Practices in the LP Gas Industry

LP Gas is a global industry operating in a wide variety of regulatory jurisdictions. These guidelines provide an important tool for industry participants and governmental authorities to ensure that the customer and the marketplace are not compromised by those who carry out 'bad practices'. Strong emphasis is placed on the good practices throughout the entire LP Gas distribution chain including the ever important 'metal management'. It is a companion Document to Guidelines for Good Safety Practices.
