

Clean Energy Expo Asia

18 – 20 November 2009 • Shangri-la Hotel, Singapore

Jointly organized by Sustainable Energy Association of Singapore (SEAS) and Koelnmesse, Clean Energy Expo Asia (CEEA) brings you a unique trading and knowledge-sharing platform for the clean energy industry in Asia Pacific. The Trade Fair and Conference bring together the leading players in the technology, services, finance and government sector to address key issues in the area of renewable energy, energy efficiency and sustainable development in the Asia Pacific region. This year, CEEA is part of the Singapore International Energy Week (SIEW), a platform for policy makers, academics and industry players to exchange ideas on energy options and strategies for the future.

Join our power-packed conference

Hear from leading industry experts and discuss financing opportunities and market trends, legislation and policies, as well as technological innovation in the area of renewable energy, energy efficiency and sustainable development in the Asia Pacific region.

Featured speaker

LPG as a Transportation Fuel in Asian Cities

Traditional transport fuels: diesel and gasoline, are identified as a primary source of air pollution and ill-health, including the incidence of respiratory diseases and cancers. LP Gas which is readily available today as a transport fuel, stands out as one of the cleanest, most convenient and accessible alternative to traditional fuels, as well as having among the lowest greenhouse gas emissions. In many instances it can also be the lowest cost option, making it an ideal solution for Asian cities.

Mr Michael Kelly

Director, Market Development
World LPG Gas Association

Michael Kelly joined the World LP Gas Association in October 2006 as the Director of Market Development. With extensive international experience in environmental policy, public affairs and communications, US born Michael has focused on the interface between business, governments and civil society. He was previously policy manager for Environment & Energy policy portfolio at the International Chamber of Commerce (ICC) in Paris where he coordinated business delegations at UN negotiations on environment, energy, climate change and sustainable development.

An international Affairs Masters graduate from the George Washington University in Washington DC, he is fluent in four languages and has worked professionally in the US, Japan, Taiwan, Italy, the UK and France.
